With world's first and only floating power plant fleet, Karadeniz Energy Group is recognized as one of the leading and pioneering actors of the world energy sector. Karadeniz Energy Group's functioning subsidiary company; Karpowership Lebanon, aims to create value to all our stakeholders and to contribute to sustainable development by prioritizing our legal obligations as well as being compliant with ISO 9001 Quality, ISO 14001 Environmental, OHSAS 18001 Occupational Health and Safety and IFC:2008 Performance Standards in order to generate electricity and to perform commercial operations on the basis of the Integrated Management System constituted parallel to our holding's vision, mission, strategy and values.

In line with this objective, we hereby declare and undertake:

- To measure and **continuously improve** our financial, operational, occupational health and safety and environmental performances by planning our annual objectives within the scope of the Integrated Management System policy,
- To develop action plans for our **continuous process** improvement by implementing health, security, environmental and social **risk analysis in our facilities** in line with the international standards ,
- To develop systems to ensure and maintain occupational health and safety in order to **prevent occupational accidents** in the direction of risk analysis,
- To have respect for people and environment and to **contribute to sustainable development** by means of keeping our environmental impacts under **control towards biodiversity and ecosystem protection**,
- To supply **extensive, cutting-edge and professional trainings** for all our employees and subcontractors who are involved in operational phases so as to assure the maximum interest in favor of our clients without disturbing local community and ecosystem during our operations,
- To **take precautions for pollution prevention**, waste minimization, widespread recycling and natural source usage reduction,
- To use materials and services concerning an increase on **energy efficiency** and conservation,
- To **enhance our cooperation** with neighboring facilities, local and authorized administrations in the field of quality, occupational health & safety and environmental aspects, and to keep our mutual affinity at the highest level with all our shareholders,
- To fulfill customer requirements on time and completely and to make arrangements towards **maximizing customer satisfaction** within our resources,
